Introduction

NGO and government managed charity been stuck on traditional ways to manage, and collect funding for many years. Overtime the unoptimal system becomes inefficient at handling so much transactions. Thus, we aim to solve that with fintech.

Problems

Problem 01

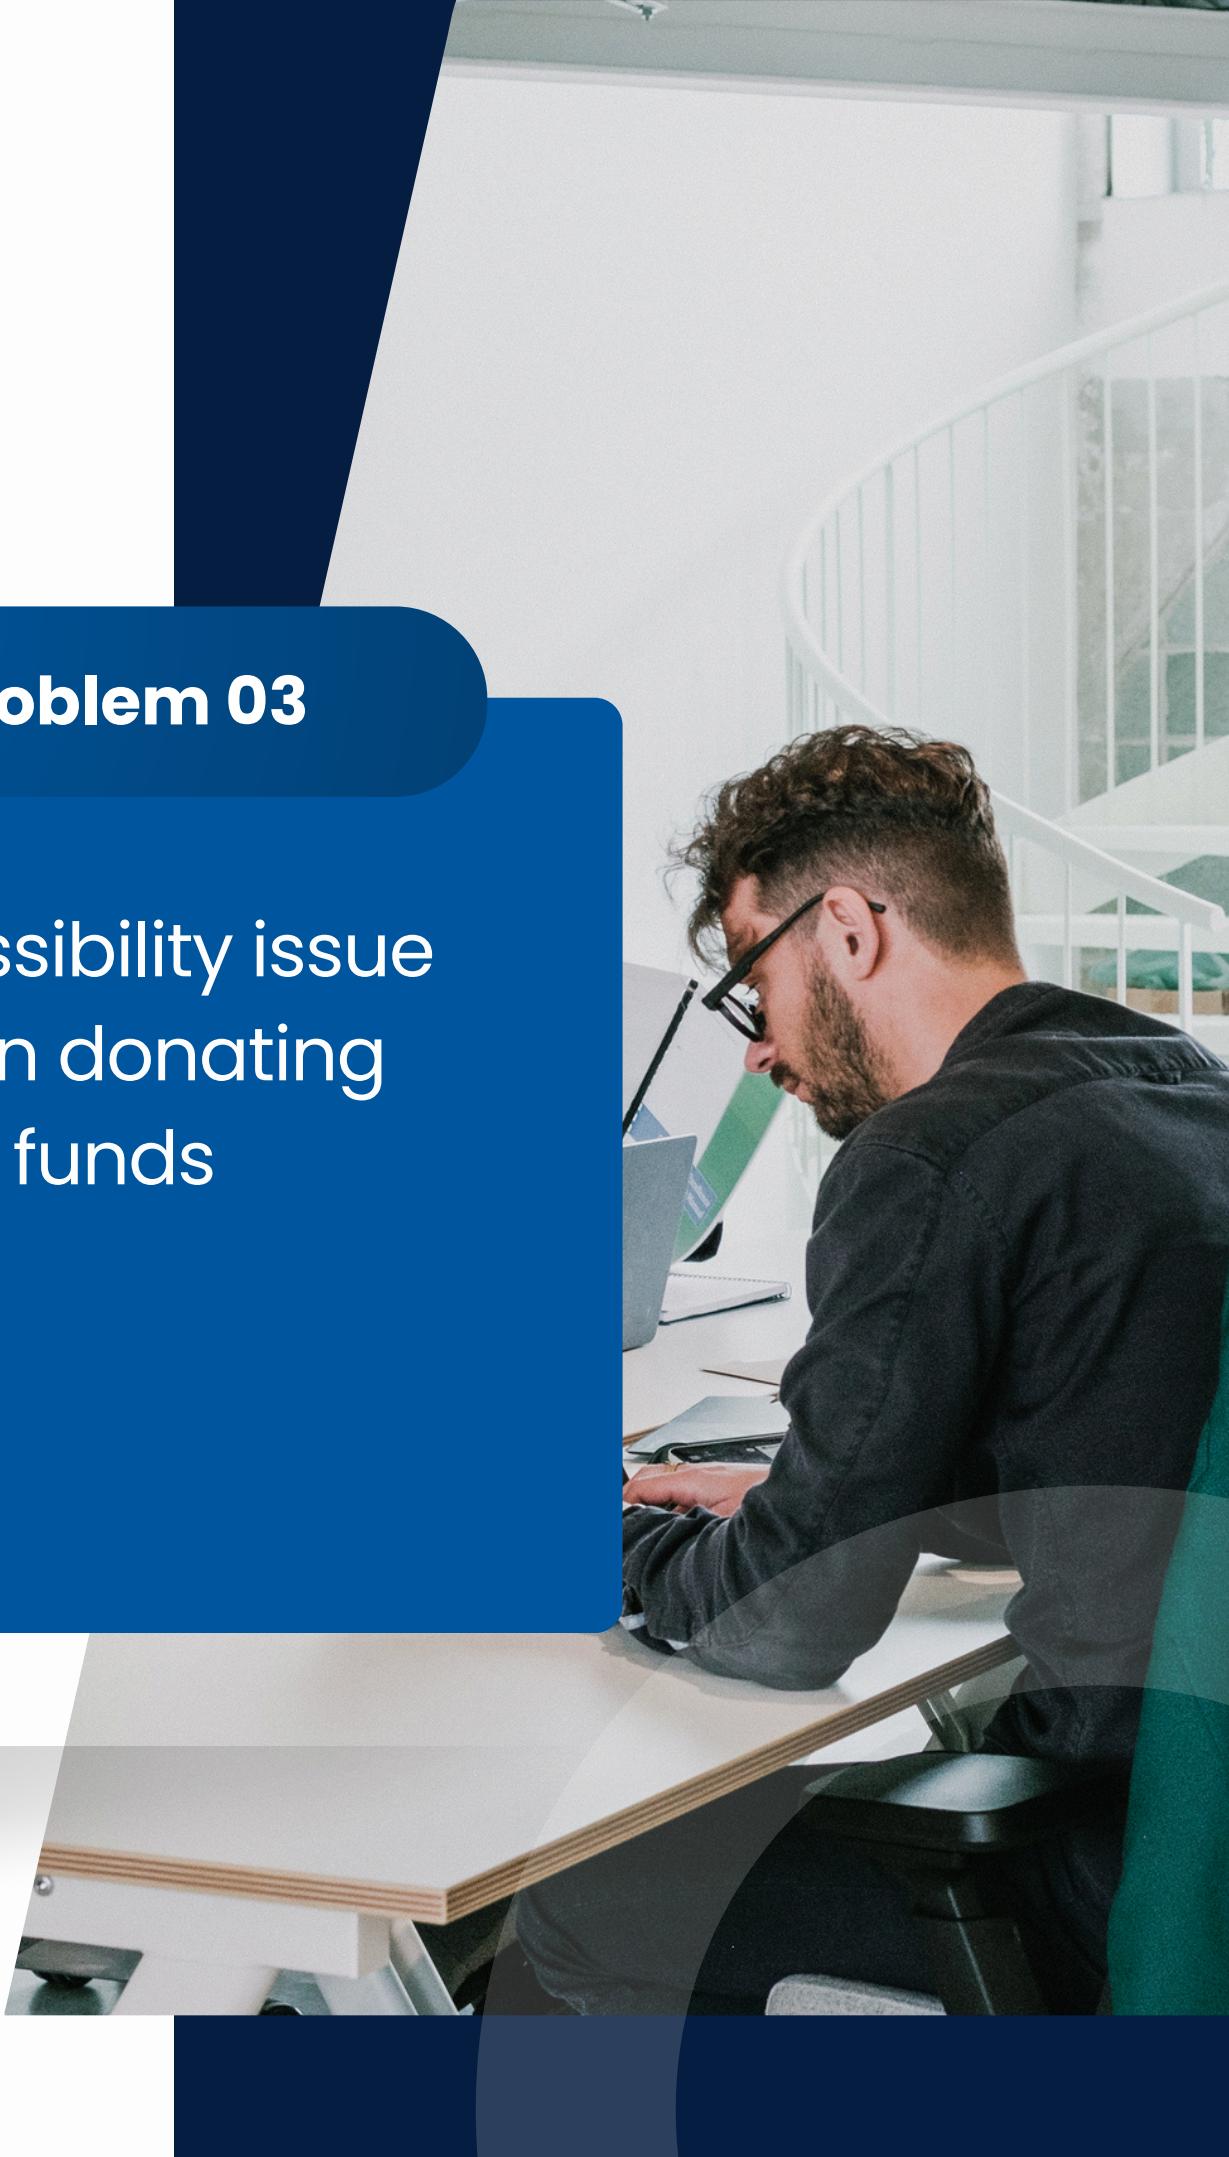

The way funds are handled by organizations are not transparent.

Problem 02

Organisation efforts are divided and unoptimal

Problem 03

Accessibility issue when donating funds

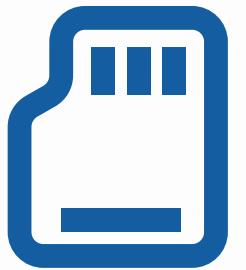

Solution

A united responsive web app for the public from all states to donate funds (e.g Zakat, Waqf, etc.) while utilising blockchain technology to ensure transparency, integrity, and security of the funds.

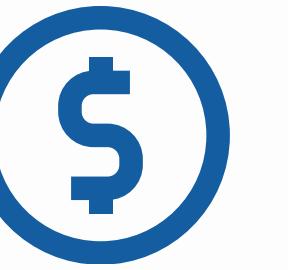

Features

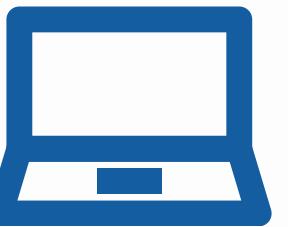

Blockchain Technology

Transparent
transactions

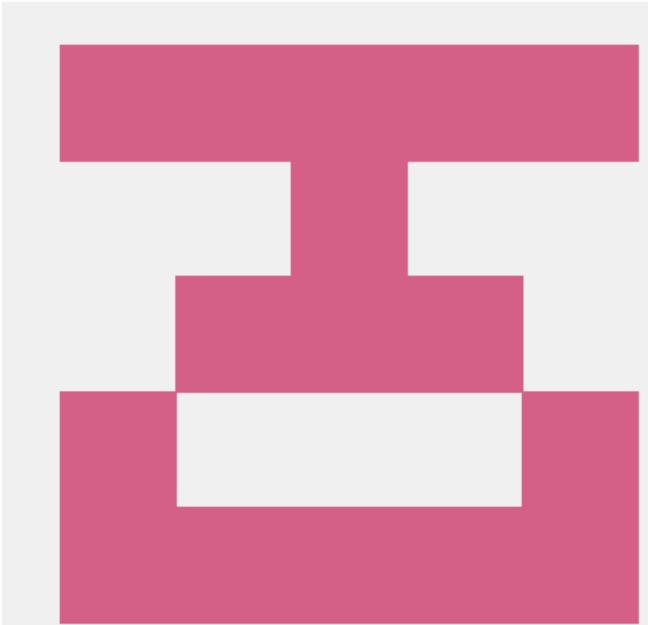

Secure Funds
Management

Democratic
Vote
